

Final Project CS619, Fall 2023

Project Name: Prediction of TV Show Popularity based on Sentiment Analysis

Problem Statement for Test Phase

You are required to develop web based application and perform the following tasks:

- ❖ Make a registration/login page by providing all necessary information of the user.
- ❖ Admin Panel:
 - After admin successful login, you have to develop the button with the title “Add show (i-e dramas, talk shows, morning shows, entertainment etc.” By clicking add new show button new form will be open to adding the more shows in it. All records must be store in a database.
 - You are required to add 6 different shows in the database as an admin and make them visible for users to view the shows and comment on them. Admin can view the comments added by the user.
 - Admin can view the comments added by the user.
- ❖ User Panel:
 - ❖ User login's to the system/application by using his/her user ID and password.

- ❖ User can edit his/her profile details along with display picture.
- Users can add comments on any added shows by the admin.
- Users can also rate any show, rating options must be all of these:
 - ✓ Numerical rating
 - ✓ Thumb up
 - ✓ thumb down
 - ✓ Star rating
